A rotating magnetic field is the resultant magnetic field produced by a system of coils symmetrically placed and supplied with polyphase currents. A rotating magnetic field can be produced by a poly-phase (two or more phases) current or by a single phase current provided that, in the latter case, two field windings are supplied and are so designed that the two resulting magnetic fields ...

Electronics for Communications Engineers, John Markus and Vin Zeluff, 1952, 619 pages - ... Audels Radiomans Guide, Edwin P. Anderson, 1945, 880 pages. An odd book, about 4-1/2" x 6-1/2" and a whopping 880 pages, "covering theory, construction, and servicing including television electronics". It covers everything from sounds waves through basic electronics, PA systems (including a little info ...
