Computer architecture is concerned with balancing the performance, efficiency, cost, and reliability of a computer system. The case of instruction set architecture can be used to illustrate the balance of these competing factors. More complex instruction sets enable programmers to write more space efficient programs, since a single instruction can encode some higher-level abstraction (such as ...

Computer Architecture. 10 Pipelining – MIPS Implementation Dr A. P. Shanthi . The objectives of this module are to discuss the basics of pipelining and discuss the implementation of the MIPS pipeline. In the previous module, we discussed the drawbacks of a single cycle implementation. We observed that the longest delay determines the clock period and it is not feasible to vary period for ...
