Desiccant Dryers are used wherever compressed air or gas needs to be dried to a pressure dew point of -20°, -40° C or, optionally, -70° C. In addition to the specific application, the size of the Desiccant Dryer is primarily determined by the medium, flow rate, operating pressure, inlet temperature and the required pressure dew point.

Hankison: Desiccant Dryers

Overview. Hankison specializes in the manufacture and supply of dehydration, filtration and air purification solutions for the global market. As an SPX FLOW brand, Hankison is dedicated to the ongoing technological progression in this field - providing factories and processing plants with access to the compressed air they need day-in, day-out.

HANKISON Compressor Service Kits - Air Compressor ...

Operation is simple and reliable. Compressed air, saturated with water vapor, flows through a bundle of tube-shaped membranes (think of tiny drinking straws). Water vapor (and a fraction of the compressed air used to sweep the water vapor out of the dryer) passes through the membrane walls. Dry air then exits the tube bundle for use downstream.
