Managing uncertainty: livelihoods in lockdown By charlotte.hawkins.17, on 22 May 2020 The COVID-19 pandemic has exposed the widespread uncertainty of everyday lives in global capitalism. For example, uncertainties related to health and resources have been exacerbated, and it has been clearly exposed how they are both often so closely intertwined.

Managing uncertainty: livelihoods in lockdown | UCL ...

Studies on uncertainty reveal the pragmatics of managing it, and its productiveness in terms of envisioned futures, hope, and other uncertainties. This thesis shows how people responded to the uncertainties of diabetes and its management within complex therapeutic landscapes in three ways: "experimenting", improvising and "trying harder" within unique social relations.

In this article we explore meanings and articulations of the future using data from our study of ethical and social issues implicated by the donation of embryos to human embryonic stem cell research in three linked assisted conception units and stem cell laboratories in the UK. Framings of the future in this field inform the professional management of uncertainty and we explore some of the tensions this involves in practice.
