The Ford Duratec V6, also known as the Mondeo V6, is an aluminum DOHC V6 engine with a 60° bank angle introduced in 1993 with the Ford Mondeo. The primary engineering input came from Porsche, who was developing a similar V6 before selling the engineering to Ford, and Cosworth, who helped with cylinder head manufacturing. The Jaguar AJ-V6 engine is similar but adds variable valve timing

Your alternator translates engine energy into electrical energy then transfers it to the car's battery. Alternators create power by translating mechanical energy generated by the motor into electrical energy, which is then directed to the battery storage of your car or truck. Your alternator is used to generate electrical power for luxuries like video screens which need more efficient power ...

Ford Auto Company wanted to make this vehicle more affordable. So, the owners had to share the engineering aspect with current Ford products such as the Falcon. The Mustang boasted a unibody structure with a wheelbase of 108 inches, stretching to 181.8 inches, from one bumper to the next. The rear suspension and coil spring shared the same features as the Falcon. However, the Mustang ...
