SECURITY □ Storage areas should be provided with security to prevent theft or unauthorised entry □ Maintain a control of who may enter the facilities □ Establish system for controlling access to the facility (including all entrances and exits) 6 STAC Academy 7.

Good Warehousing Practices (GWH) in Pharmaceutical Industry

Each workload is different so the best advice is to experiment with partitioning to see what works best for your workload. Consider lower granularity than what may have worked for you in SQL Server. For example, consider using weekly or monthly partitions rather than daily partitions. See also Table partitioning. Minimize transaction sizes

Best practices for Synapse SQL pool in Azure Synapse ...

As a best practice, create custom roles when needed. Add users to the role with the least privileges required to do their job function. Do not assign permissions directly to users. The server admin account is a member of the built-in db_owner role, which has extensive permissions and should only be granted to few users with administrative duties.

Security Overview - Azure SQL Database & Azure SQL Managed ...

The ideal best practice is to assign a unique long non-obvious password for each camera. Such a meticulous process takes time to setup, is more difficult to administer, and is very hard to track. Therefore, many installers, unfortunately, use a single password for all of the cameras in an account.
